Claims objection

When new claims are presented in an application, they must be numbered consecutively. As the result of claim 39 missing all claims from 40-100 are misnumbered. for examination purpose the misnumbered claims 40-100 have been renumbered as claims 39-99 consecutively.

Claims 40-100 are objected to because of the following informalities: claims are misnumbered. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 11, 13-14, 18, 19, 21, 22, 40, 46, 82 and 88-92, are rejected under 35 U.S.C. 102(e) as being anticipated by Dwyer et al. (6,671,567).

As to claim 83, Dwyer teach, in a system for providing satisfactory integration between a digital voice recorder (Fig.1, 12) and personal computer (16) for convenient transfer and management of voice information stored in the digital voice recorder, a digital bit stream of computer data signals, comprising:

A segment of data representing voice message (Fig.5); and

A header containing information defining the relationship between the voice message and personal information (Col.2, lines 24-37), to be processed by application.

As to claims 88-89, Dwyer teaches a communication cable (15) for connecting the DVR to the personal computer (Fig.1).

As to claim 90, Dwyer teaches wherein the voice file is stored on a computer readable storage (Fig.3, 64).

With regard to claims 46, Dwyer teaches the corresponding apparatus (Fig.1) for transferring voice file between a personal computer (PIM application) and a digital voice recorder, wherein system allow the user to apply the file (voice message and header data) management capabilities.

As to claims 13-14, 21-22, Dwyer teaches where the data in the DVR is formatted for interfacing with the personal computer for information management purpose (Fig.5; Col.5, lines 60-63).

Claims 1, 11, 18, 19, 40, 91-92 are analogous to the claims addressed above and are rejected by Dwyer for the foregoing reasons.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 15-17, 20, 23-29, 44, 45, 50, 51 and 94 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dwyer.

As to claims 4-9 12, 20, 23-29, 44, 45, 50, 51 and 94, Official Notice is taken that enhancing voice, Copying, deleting a file and recording/logging the transferred file are well known and common in the art of voice recorder and reproducer and it would have been obvious to one of ordinary skill in the art to include them in Dwyer's system for the purpose of utilizing them in the file storage, transfer and management process.

Allowable Subject Matter

Claims 30-38, 40, 52-81, 95-99 are allowed.

The following is an examiner's statement of reasons for allowance: Dwyer doesn't teach creating the automated digital voice recorder to PIM synchronization message as recited. Transforming text to speech is not also taught by Dwyer.

Claims 2, 3, 10, 47-49, 83-87, 93 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Klayman 6,993,480 voice enhancement system.
